DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 12-21, drawn to motor drive control apparatus, classified in class 318, subclass 802.

Group II, claim(s) 7-11 and 22-25, drawn to a motor control apparatus for controlling a motor, classified in class 318, subclass 400.02.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Invention I and II are directed to related products. The related inventions are distinct if the inventions as claimed are mutually exclusive, not obvious and have materially different mode of operation. In the instant case,

Invention I is directed to a motor drive control apparatus whose object is to switch between a vector control and a

rectangular wave control in accordance to the rotation speed calculated by a position estimating circuit.

Invention II is directed to a control apparatus for controlling a motor whose object is to obtain a d-axis current command value from a torque command value, an angular speed and a mechanical angular speed.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
